He also composed for TV Shows, dramas and advertisements.

He founded 'Syncope' orchestra, he arranged and conducted
The "Cinemania" project With Nesma Mahgoub & group of artists which was a major success.

Syncope Orchestra

The orchestra was founded by Maestro George, it was started by a small group for a big dream achieved not long after.
“Syncope” as a musical term means irregular rhythm and the inspiration for the name was because Maestro Kolta wanted to break all traditional styles that frame the orchestral work.
Syncope is meant to move the cultural eye to make orchestral work closer to the audience and to attract more ears with no age limit young and old. This is expressed in the composition and the structure of the instruments and the great arrangements, as well as the selection of the musical works.

Maestro Kolta succeeded in combining three different types of orchestra in one (Classical, Band, and Oriental or Arabic) when you see it looks easy but it’s really hard work to bring that together in such a smooth way like watching in live performance or a TV show.
Reflecting this mix maestro Kolta was able to perform many successful concerts, TV shows and recording sessions.
The quality and the great sound of Syncope Orchestra have lifted the name high in no time and made the demand really high for having such a quality. The number of concerts done was incredible for a rising orchestra but the hard work paid off.

One of the greatest things to mention about Syncope is that even in TV shows it’s still a live performance, and you can grasp the same experience as watching them live on the screens.
